

Water Quality Monitor

The Horner Solutions Water Quality Monitor is a preprogrammed solution meant to help monitor numerous different types of data in your water system

Water Quality Monitor

- Ability to monitor pH, ORP, and Conductivity
- Can also be configured to monitor flow (4-20ma or pulse input) and temperature (PT100 RTD)
- Large 10" color touchscreen for great visibility and easy to use interface
- Built-in trending and datalogging to show data over time
- Configurable warning and alarming levels that can be both displayed and sent out via e-mail
- Digital inputs that can also be configured for external alarms
